Identity Devices

Making High Security Convenient

IDENTIV

For over 30 years, Identiv has helped secure identity and data, making high security more convenient.

Identiv's contact and contactless smart card readers are the international gold standard.

As the world leader in smart card reader manufacturing, Identiv's identity devices and solutions are utilized around the world to enable security and identification, transaction, e-health, and e-government applications.

The evolution of our product suite also includes cards, wearables, and support for mobile devices. We respond with innovation as technology trends continue to shape the industry: developing FIDO security keys that are FIPS-compliant and manufactured in the U.S., developing iAuthenticate™ and myAuthenticate™ smart card readers for Apple® iOS and Android™ mobile devices, and developing 125 kHz and 13.56 MHz smart card readers and modules for various desktop and embedded applications.

Identity Devices

- RFID, NFC, and proximity smart card readers
- uTrust FIDO2 Security Keys
- Mobile smart card readers
- Contact and contactless smart card readers
- Smart card reader module
- uTrust TS Cards
- uTrust MD Smart Cards
- uTrust Proximity Credentials

identiv.com/about

Identiv's portfolio of identity devices supports a large number of strong authentication use cases.

Identiv protects your identity and most sensitive data from cybersecurity threats.

IT leaders face the challenge of not only implementing strong authentication solutions to protect identities and data, they must also provide a scalable, cost-effective, user-friendly experience. If this is not addressed, the solution can end up causing more problems for the organization.

Identiv's portfolio of identity devices provide support for a large number of authentication uses cases, enabling a richer, seamless user experience within an organization.

Whether the user is at a desktop or using a or laptop or tablet through a VPN, Identiv has an authenticator to meet your needs.

Use Case: Remote Authentication for Employees

Using Identiv uTrust Smart Cards and contact/contactless smart card readers, organizations can ensure that their networks and data are only being accessed by authorized personnel.

IDENTIV

identiv.com/about
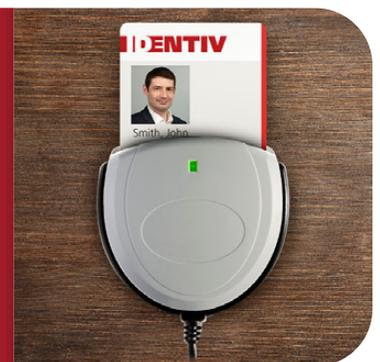

Identiv serves up a comprehensive, end-to-end portfolio of credentials in a variety of form factors.

Identiv's credentials, ID cards, and smart cards are available for physical, logical, and converged access control.

Our single-technology, multi-technology, and contact-chip credentials are ideal for building and computer access, transit payment, brand protection, time and attendance, cashless vending, and IoT applications.

With competitive pricing, the fastest turnaround, free samples, and a lifetime warranty, Identiv's customer-centric business model sets us apart from all other providers on the market.

We offer over 35 leading formats, free credential tracking with our NextUp Program, our full-service uTrust Cards Service Bureau for centralized plastic credential card issuance and personalization, and custom printing and encoding.

Use Case: Small-to-Medium Businesses

Identiv's uTrust Cards Service Bureau provides advanced personalization services and provides central issuance. Ship to customer sites for distribution or issue cards to individual employees.
