

Access

Velocity (Enterprise)

- Velocity 3.8.6 now on GSA APL
- Preview Maps in Velocity Web for faster visibility

Primis (SMB)

- EB2-2D Encryption Bridge
- Primis v12.1
- Primis Cube v2

Readers + Authentication

- ScrambleFactor SF.1 multi-factor reader
- Supports PIV, CAC, & DESFire
- Scrambling keypad with customizable layouts
- Software-driven updates to adapt over time

Integrations & Command

Unified Edge-to-Core Monitoring

- Manage access, video, intrusion & more in one interface
- Fewer clicks during alarms & investigations
- Standardized workflows across sites
- Customizable UI based on operator roles
- Scales from single-site to multi-site environments

Video Intelligence

Expanded VMS Capabilities

- Arcules cloud video integration
- New plug-in support for Vision Client
- SCIM support for streamlined user management
- Improved mobile experience (Android navigation updates)
- Enhanced alarm visibility & notifications

Perimeter Protection

Real-Time Detection

- Active infrared sensors for immediate breach detection
- AI-driven analytics for accurate threat identification
- Rapid pinpointing of intrusion attempts
- Native integration with Velocity & Velocity Vision

Intrusion Detection

Expanded Capabilities

- HATCH-SECURE detection system
- Designed for hatches, covers & manholes
- Multi-sensor detection (motion, light, impact)
- Detects opening, drilling & cutting attempts

WHAT IS VELOCITY ONE?

One **Unified** Security Ecosystem

Velocity One is Hirsch's unified ecosystem — connecting perimeter, intrusion, access, video, identity and platform integrations into one coordinated security experience.

Security today is fragmented.

- Multiple systems
- Separate consoles
- Disconnected workflows

The result?

- Slow response
- Limited visibility
- Operational complexity

Velocity One is how Hirsch technologies work together as one unified security ecosystem.

- ✓ One view across security layers
- ✓ One workflow from alert to response
- ✓ One path to scale over time

Perimeter
