

GUESS WHO'S BACK?

For 43 years, Hirsch has been the name you trust to secure the most critical places — from federal courthouses to your local schools. Join us as we revive a legacy of innovation and trust in technology.

Hirsch returns to lead the future of security with the most complete high-security, end-to-end platform in the industry.

ScrambleFactor | High-Assurance Three-Factor Reader

- Three-Factor Authentication: PIN, RFID, and biometric verification
- High Assurance Security: Meets U.S. government FICAM PIV and CAK standards
- Customizable Interface: Viewing restrictors and customizable keypad layouts
- Future-Proof: Software-driven for continuous updates, ensuring evolving security

Velocity 3.8.6 | ScrambleFactor Reader Support

- Multi-Factor Authentication: Supports contactless, contact, PIN, and fingerprint matching
- Fast Credentials: Compatible with OSDP and FICAM modes for rapid performance
- Easy Upgrades: Retrofits into Hirsch mounting boxes with new auto-discovery firmware

Velocity Vision 4.3 | Enhanced Real-Time VMS

- User Experience: Renewed Smart and Web Client interfaces
- Smart Map: Accessible in Mobile Clients for real-time tracking
- Failover Support: Management Server Failover for uninterrupted operations
- Installation: Improved experience with Managed SQL Service support

Enterprise Mobile | Elevating Entry Communication

- User Experience: Renewed Smart and Web Client interfaces
- Smart Map: Accessible in Mobile Clients for real-time tracking
- Failover Support: Management Server Failover for uninterrupted operations
- Installation: Improved experience with Managed SQL Service support

Primis Access Control | Next-Generation Security

- Primis On-Premises: Appliance-based, encrypted IP-network communication
- Primis Cloud: ACaaS offering hosted in a secure AWS virtual environment
- Primis Mobile: Replaces physical credentials with GPS technology access control
- EG-2 Controller: Manages local access control

Velocity Vision is a unified, open-platform video management system (VMS) built to provide a data-enabled security solution delivering intelligence in a single-pane-of-glass view.

Incredibly cost-effective Primis Cloud is a cloud-based Access Control as a Service (ACaaS) subscription-based offering for the Primis access control solution. Primis Cloud allows users to control, manage, and maintain their physical access control systems (PACS) via the intuitive, always-up-to-date, browser-based web administration.

Cirrus is a cloud-based Access Control as a Service (ACaaS) solution for award-winning Hirsch physical access, allowing users to control, manage, maintain, and update their solution via a fast, simple-to-navigate web user interface.
