10 Reasons to Choose Velocity Vision

1 Real-time visual intelligence:
Get complete situation awareness on a single pane of glass, collect more intelligent security and business data, and react in real-time

2 Anywhere operations:
Leverage on-premises, cloud, hybrid, and mobile

3 End-to-end security:
Connect external systems and data for use in dashboards, maps, and investigations without complex integration

4 Custom build:
Integrate with technologies from 100+ ecosystem partners for the latest in artificial intelligence (AI), GPS, access control, and building management

5 Best-in-class hardware:
Choose high-security client workstations, compute servers, storage, access control servers, analytics/AI servers, video recording servers, and switches

6 Risk mitigation:
Engage in faster response, comprehensive case management, and solid compliance

7 Trusted combination:
Get performance and reliability with the exceptional, renowned Hirsch experience in an open API security platform

8 Organizational flexibility:
Customize with an optional software development kit (SDK) to address specific company or industry requirements

9 Ability to grow:
Scale up to 1,000s of devices, get support for 8,500+ camera models, and combine with 15,000+ ONVIFcompliant solutions

10 Hanwha Techwin partnership:
Choose cameras from a team committed to cybersecurity and National Defense Authorization Act (NDAA) compliance
