

Velocity Central Airports | Solution Overview

Monitoring | Reporting | Control

Enhanced Control with Velocity Central

Integrations

Access, Intrusion, Fire, Intercom, Perimeter Detection, HVAC & more

Fully Customizable

Define your specific needs, and Hirsch Professional Services (HPS) will tailor a Velocity System just for you

Workflow & Alarm Management

Guide operators through response procedures when quick and accurate responses matter most

Video Overlay

Display door status & trigger options directly over live video, eliminating the need to switch screens during critical moments

User Messaging

Enable instant communication between operators to enhance situational awareness

Automated Options

Configure Velocity Central to automatically trigger actions based on predefined events for increased efficiency

Benefits for Airports

Simplified Control

Use disparate systems all in one place, reducing clicks for operators during critical events

Enhanced Passenger Experience

Streamline operations by integrating systems for event management, trend analysis, and passenger satisfaction

Expands with You

As your airport expands, Velocity Central adapts to future demands without extensive renovations

Incident Tracking

Log alarms and failures to help troubleshoot issues and improve system reliability
