Product Comparison Chart

Introduction

As the world's leading provider of open platform IP video management software (VMS), Hirsch offers a wide range of VMS products optimized for different types of deployment and usage. This document provides an in-depth comparable outline of Hirsch's Velocity Vision VMS products and the associated clients.

This document is intended as a technical sales tool with two primary purposes:
- To provide an overview of the features that each Velocity Vision product provides
- To support the selection of the optimal product by offering a visible comparison between the various products in the Velocity Vision product range

This document contains several separate comparison charts, for Velocity Vision VMS platform products and for Velocity Vision clients, where each product category has an overview comparison chart, followed by a more detailed and comprehensive chart.

The following Velocity Vision VMS platform products are covered:
- Velocity Vision Enterprise
- Velocity Vision Pro
- Velocity Vision Advanced
- Velocity Vision Standard

The following Velocity Vision clients are covered:
- Velocity Vision Smart Client
- Velocity Vision Web Client
- Velocity Vision Mobile

The document does not cover Velocity Vision Extensions or Hirsch Utilities.

The information in this document only provides basic information. Refer to the individual product specification sheets for a complete listing of all features for a given Velocity Vision product.

Hirsch reserves the right to change the product specifications without prior notice.
