

City of Sacramento
A Blueprint for Urban Protection

The City of Sacramento, known for its rich history and vibrant cultural scene, sought a comprehensive security solution for its city buildings, including the iconic Sacramento Convention Center and the esteemed Crocker Art Museum. The challenge was to secure city buildings, protect city employees, and safeguard assets with a solution that could be easily scaled and managed by IT, facilities, and security teams.

“Partnering with the City of Sacramento and Identiv on this project was a great experience. The Hirsch Velocity system has significantly improved the city’s security infrastructure with its easy integration and scalability. We’re proud to have contributed to this success and look forward to future collaborations.”

DEALER

Access Systems

PROBLEM

SECURITY: Ensuring the safety of city buildings, employees, and assets

SCALABILITY: Implementing a solution that could grow with the city's evolving needs

MANAGEMENT: Providing a system that could be easily managed by various teams

SOLUTION

Identiv's end-to-end Hirsch Velocity security management system with uTrust Migration Readers and Cards was chosen as the ideal solution to meet the City of Sacramento's security needs. The system was implemented across various departments, including the SAFE Convention Center, ensuring a unified security approach.

Key Features

- **Unified Security:** Hirsch Velocity provided a centralized platform for managing access control across all city buildings
- **Migration Readers and Cards:** High-security readers and credentials enabled a seamless transition to the new system without disrupting existing operations
- **Scalability:** The system's modular design allowed for easy expansion to accommodate the city's growth
- **Certification:** City of Sacramento employees underwent certification courses provided by Identiv, ensuring they were equipped with the necessary skills to manage the system effectively

Outcome

The implementation of Hirsch Velocity has significantly enhanced the security infrastructure of the City of Sacramento. The system's scalability and ease of management have empowered IT, facilities, and security teams to efficiently oversee access control across multiple sites. The certification courses provided by Identiv Academy have further ensured that employees are well-trained in utilizing the system to its fullest potential.

Access Systems played a crucial role in the successful deployment of Hirsch Velocity.

Their expertise and support ensured a smooth implementation process, meeting the city's security requirements and expectations.

The City of Sacramento's adoption of Hirsch Velocity with migration readers and credentials has set a benchmark for municipal security. The system's scalability, ease of management, and comprehensive security features have made it an invaluable asset for the city, ensuring the safety of its buildings, employees, and assets.
