

# Velocity Central

Monitoring | Reporting | Control

Velocity Central is a situational platform that combines access control, video surveillance, intrusion, fire, intercom, and building management solutions into a single edge to core command and monitoring environment.

Acting as the hub of Hirsch's Velocity ecosystem, Velocity Central integrates the Velocity security management system, Velocity Vision VMS, Hirsch Hardware, as well as many third-party applications.

Monitor, report, and control these systems in Velocity Central's fully customizable interface.

Designed with operators in mind, Velocity Central can be custom built to look and feel exactly as a customer desires.

From custom structures and workflows to alarm and video management, site mapping, and more, Velocity Central can be transformed into one cohesive display.

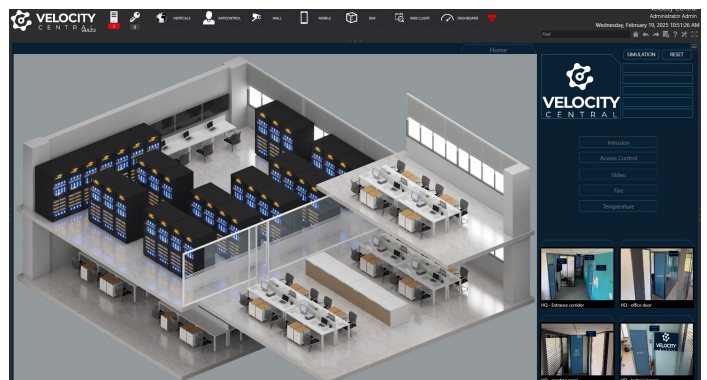

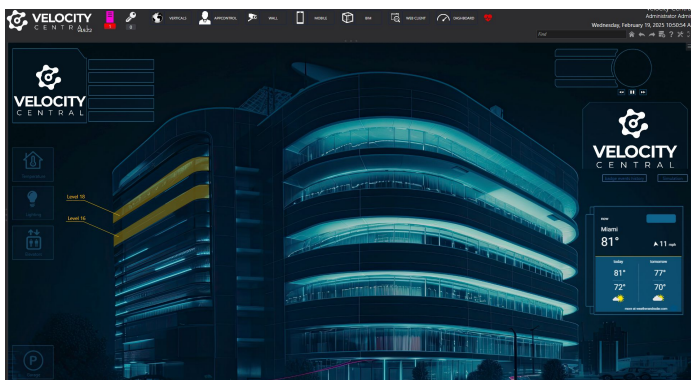

## Key Features

- **Federated System Monitoring:** Integrates Hirsch and multi-brand systems into a single, cohesive user-friendly interface
- **Preventive Maintenance:** Centralizes system status, allowing for maintenance schedules and error reporting to be gathered in one place
- **Scalable and Flexible:** Adapts to single-site facilities or expansive multi-site ecosystems
- **Customizable User Interface:** Allows the interface to be tailored to operators' needs

## Why Choose Velocity Central?

- Faster Alarm Response:** Automated workflows have reduced alarm response times by up to 85% for existing customers.
- Simple Upgrades:** Modernize outdated systems with a new interface, eliminating the need for costly hardware replacements.
- Reduced Manual Effort:** Velocity Central enables operators to automate up to 98% of daily tasks, freeing them to focus on higher-value work.
- Lower Operational Costs:** Customers report a 25% reduction in operational expenses as a result of decreased on-site manual interventions.

## Enhanced Control with Velocity Central

- Integrations:** Access, Intrusion, Fire, Intercom, HVAC & more
- Fully Customizable:** Define your specific needs, and Hirsch's Professional Services will tailor a Velocity System just for you
- Workflow & Alarm Management:** Guide operators through response procedures when quick and accurate responses matter most
- Video Overlay:** Display door status & trigger options directly over live video, eliminating the need to switch screens during critical moments
- User Messaging:** Enable instant communication between operators to enhance situational awareness
- Automated Options:** Configure Velocity Central to automatically trigger actions based on predefined events for increased efficiency
