

Android CCID Library Release Notes

Version 1.4

Version 1.4

1. Library and sample can be used with Android 10 and later.
2. Min SDK requirement is now 29.
3. Sample is now ported to Android Studio. Recommended to use latest version of Android Studio (Giraffe or later).
4. Following are SCardListener implementation known limitations that will be fixed in future release:
 - a. It is recommended to use SCardListener to detect card arrival events only as the implementation interferes with card operation after card power up.
 - b. It is not recommended to use SCardListener on battery powered devices as the implementation tends to deplete battery.

Version 1.3

1. Support for all new Android versions.
2. Add SCardListener for card insertion/removal events.

Version 1.2

1. SCardDisconnect was not releasing connection properly. This has been addressed.
2. Library used to crash if SCardInitialize was called when no device was plugged in. This has been addressed.

Version 1.0

1. SCardReconnect, SCardGetStatusChange and SCardGetAttrib is now implemented.

Version 0.1

1. First version of Android library.
